

Your Facial Health Summary

Report for: 001 | Date: 09 September 2026

Analysis Visualization

The highlighted areas show the regions we analyzed.

● Looks healthy

● Slightly noticeable

● Worth monitoring

● Noticeably present

Overall Result

Several things were flagged that may be worth discussing with a professional.

The system's Observation Density Score in this analysis: **83%**.

- 1 significant observation(s) detected requiring attention.
- 2 noticeable observation(s) identified.
- Note: This report contains visual observations only and does not constitute a medical diagnosis. Please consult a qualified healthcare professional for any health concerns.

Face Shape & Balance

This section looks at the overall balance, symmetry, and shape of your face.

- Observation: Slight facial unevenness noted (Normal Symmetry, score 79/100). Minor variations are common and typically insignificant.
- Head alignment appears level.
- Observation: Face appears relatively wide for its height.
- No swelling indicators detected based on facial proportions.

Eyes

We looked at signs of tiredness, puffiness, redness, and how open your eyes appear.

- No significant dark circles observed under left eye.
- No visible redness in left eye.
- **Observation: Notable slight swelling around left eye.**
- No significant dark circles observed under right eye.

- No visible redness in right eye.
- Slight difference in eye openness noted (left 89/100, right 100/100).

Skin

We checked for signs of breakouts, redness, and uneven texture across your forehead, cheeks, and nose.

- Lighting on forehead was too low to reliably assess texture or spot detail in this region; those readings are not included here.
- **Observation: Moderate skin redness on forehead.**
- Lighting on left cheek was too low to reliably assess texture or spot detail in this region; those readings are not included here.
- No significant skin spots detected on right cheek.
- No significant skin spots detected on nose.

Lips

We checked your lips for dryness, colour unevenness, and paleness.

- Lighting on the lips was too low to reliably assess dryness; that reading is not included here.

Mouth & Expression

We looked at the shape and balance of your mouth at rest.

- **Observation: Moderate difference in mouth corner height between left and right. May reflect natural unevenness or positional artifact.**
- Mouth corners appear raised (smile-like curvature, score 11).

What to do next

- Some noticeable findings were detected. Consider showing this report to a healthcare professional if any of the highlighted areas concern you.
- This analysis is a starting point, not a diagnosis. A professional can give you a proper assessment.
- For the most accurate results, use good lighting and face the camera directly with a neutral expression.

Important: This report is produced by an automated image analysis system and is for personal information only. It is not a medical diagnosis or clinical assessment. Please consult a qualified healthcare professional if you have concerns about your health.
