

Your Facial Health Summary

Report for: 001 | Date: 09 September 2026

Analysis Visualization

The highlighted areas show the regions we analyzed.

● Looks healthy

● Slightly noticeable

● Worth monitoring

● Noticeably present

Overall Result

Some areas are worth keeping an eye on.

The system's Observation Density Score in this analysis: 100%.

- 2 noticeable observation(s) identified.
- 4 slight observation(s) noted.
- Note: This report contains visual observations only and does not constitute a medical diagnosis. Please consult a qualified healthcare professional for any health concerns.

Face Shape & Balance

This section looks at the overall balance, symmetry, and shape of your face.

- Observation: Slight facial unevenness noted (Normal Symmetry, score 85/100). Minor variations are common and typically insignificant.
- Slight head tilt observed (-3.7°). May be positional.
- Observation: Face appears relatively wide for its height.
- No swelling indicators detected based on facial proportions.

Eyes

We looked at signs of tiredness, puffiness, redness, and how open your eyes appear.

- Possible indicator: Mild dark circles visible under left eye.
- No visible redness in left eye.
- Possible indicator: Moderate dark circles visible under right eye.
- No visible redness in right eye.

- Slight difference in eye openness noted (left 84/100, right 100/100).

Skin

We checked for signs of breakouts, redness, and uneven texture across your forehead, cheeks, and nose.

- No significant skin spots detected on forehead.
- No significant skin spots detected on left cheek.
- Observation: Mild skin uneven skin texture on left cheek.
- No significant skin spots detected on right cheek.
- No significant skin spots detected on nose.

Lips

We checked your lips for dryness, colour unevenness, and paleness.

- Possible indicator: Moderate lip dryness observed.
- Visible sign: Mild lip paleness (reduced color saturation) observed. Possible indicator of reduced circulation in lip area.

Mouth & Expression

We looked at the shape and balance of your mouth at rest.

- Slight difference in mouth corner height noted between left and right.
- Mouth appears in a neutral resting position.

What to do next

- Some noticeable findings were detected. Consider showing this report to a healthcare professional if any of the highlighted areas concern you.
- This analysis is a starting point, not a diagnosis. A professional can give you a proper assessment.
- For the most accurate results, use good lighting and face the camera directly with a neutral expression.

Important: This report is produced by an automated image analysis system and is for personal information only. It is not a medical diagnosis or clinical assessment. Please consult a qualified healthcare professional if you have concerns about your health.
