

Your Facial Health Summary

Report for: 001 | Date: 26 September 2026

Analysis Visualization

The highlighted areas show the regions we analyzed.

● Looks healthy

● Slightly noticeable

● Worth monitoring

● Noticeably present

Overall Result

A few minor things were noticed — nothing alarming.

The system's Observation Score for this analysis: **89%**.

- 4 slight observation(s) noted.
- Note: This report contains visual observations only and does not constitute a medical diagnosis. Please consult a qualified healthcare professional for any health concerns.

Face Shape & Balance

This section looks at the overall balance, symmetry, and shape of your face.

- Face symmetry appears normal (Highly Symmetric, score 92/100).
- Head alignment appears level.
- Observation: Face appears relatively wide for its height.
- No swelling indicators detected based on facial proportions.

Eyes

We looked at signs of tiredness, puffiness, redness, and how open your eyes appear.

- No significant dark circles observed under left eye.
- No visible redness in left eye.
- No significant dark circles observed under right eye.
- No visible redness in right eye.

Skin

We checked for signs of breakouts, redness, and uneven texture across your forehead, cheeks, and nose.

- No significant skin spots detected on forehead.
- Observation: Mild skin redness on forehead.
- No significant skin spots detected on left cheek.
- No significant skin spots detected on right cheek.
- No significant skin spots detected on nose.

Lips

We checked your lips for dryness, colour unevenness, and paleness.

- Possible indicator: Mild lip dryness observed.
- Visible sign: Mild lip paleness (reduced color saturation) observed. Possible indicator of reduced circulation in lip area.

Mouth & Expression

We looked at the shape and balance of your mouth at rest.

- Slight difference in mouth corner height noted between left and right.
- Mouth appears in a neutral resting position.

What to do next

- A few minor things were noted. These are often caused by tiredness, lighting, or day-to-day variation. Run another analysis in a few days to see if they persist.
- For the most accurate results, use good lighting and face the camera directly with a neutral expression.
